

# ARNING **SOLAR** CANOPY & CARPORT STRUCTURES

**Arning Solar Canopies are a great way to provide protection from the elements while generating clean energy for your organization.**

Solar canopies are a great way to reduce your carbon footprint while providing coverage for walkways, parking lots, dining areas, playgrounds and more. We work directly with the solar provider to design and engineer a canopy that perfectly fits your needs.

Our robust, free standing canopies are constructed from steel and can be positioned for maximum sun exposure.

## **Benefits of an Arning Solar Canopy:**

- Pays for itself over time
- Lower energy bills
- Tax incentives
- Reduced carbon footprint
- Eco-friendly public perception
- Increased property value
- Excess energy can be sold back to your electric company

Solar canopies can be customized to fit available space and need.
